SHIMADZU
Excellence in Science

Compact Dry

Shimadzu CompactDry™ is a ready-to-use chromogenic dry culture medium designed for the rapid detection and enumeration of microorganisms in food, beverages, water, pharmaceuticals, cosmetics, and environmental samples. Its patented dry-sheet technology eliminates the need for media preparation, sterilization, or agar pouring, providing a faster, cleaner, and more efficient microbiological testing workflow.

CompactDry™ delivers accurate, reproducible results with easy-to-read colored colonies, making routine quality control simple and reliable. The compact format reduces storage requirements and laboratory waste while minimizing the risk of contamination.

Applications
Food and beverage testing • Dairy products • Water quality monitoring • Pharmaceutical and cosmetic quality control • HACCP verification and hygiene monitoring.

REGA BIOTECHNOLOGY INC.

Food Testing Solutions

REGA Biotechnology supports food safety with all food testing solutions

All ALLERGEN PARAMETERS AVAILABLE

ALMOND | BUCKWHEAT | HS-CASEIN | EGG | FISH | GLUTEN | PEANUT | SHELLFISH | SOY | MANGO | SESAME

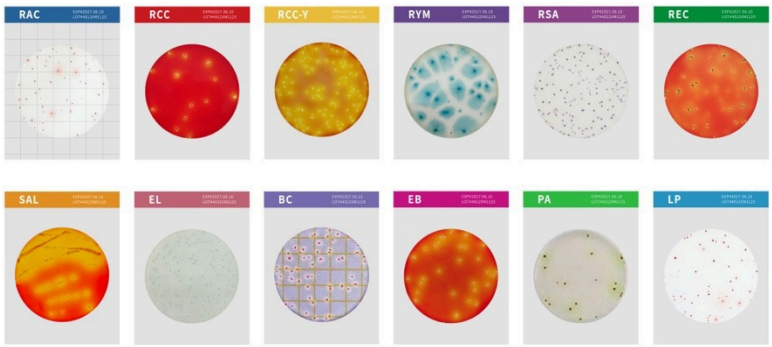

Shenzhen Bioeasy Biotechnology Co,. Ltd.

Bioeasy specializes in rapid testing technologies for food safety and quality assurance. Its solutions provide fast and reliable detection of contaminants, residues, toxins, and pathogens across the food production chain.

Product Portfolio; includes

- **Mycotoxin Rapid Test Kits**
- **Antibiotic Residue Test Kits**
- **Pesticide Residue Detection Kits**
- **Veterinary Drug Residue Tests**
- **Food Safety Analyzers**
- **Immunochromatographic Assays**
- **Vitamin method**

CountEasy Plates

world bioproducts

Environmental monitoring requires collecting samples from a wide variety of surfaces, from processing equipment and conveyors, to drains and expansive floor or wall surfaces.

YILI BIOTECH

YILI Biotechnology focusesheavily on food safety testing technologies and provides a complete portfolio of rapid and laboratory-baseddetection systems. Including Food contamination screening and environmental hygiene verification

Product Portfolio

- **ATPHygieneMonitoringSystems**

DISTELL.COM

Distell Fish Freshness

Distell's Fish Freshness Meter enables the operator to assess the quality and freshness of wet fish simply and easily.

The Distell Meat Fat Trapper is a rapid, easy-to-use instrument for measuring fat content in meat products to support quality control and consistent production.

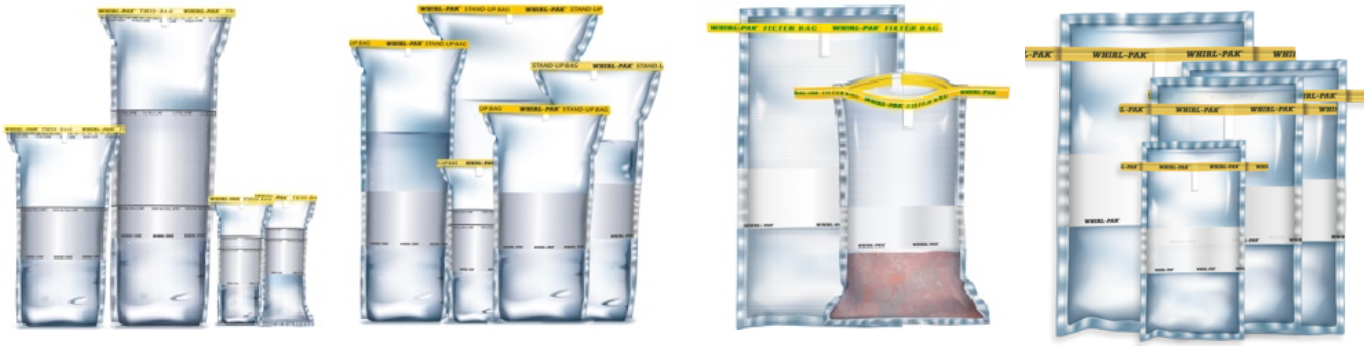

WHIRL-PAK®
Filtration Group

Whirl-Pak's Sterilized Bags are an ideal sustainable shipping and storage solution and are specifically designed for sampling chlorinated water. Suitable in all sectors including municipalities, swimming pools, waste water and other areas to test for fecal coliforms, legionella and other bacteria.

Including 4 categories;

1. **Whirl-Pak's Thio Dosed**
2. **Whirl-Pak's UnDosed Stand Up Sterilized Bags**
3. **Whirl-Pak's Sterilized Filter Bag**
4. **Whirl-Pak's Write On Sterilized Bag With built-in secure closure tabs**

ThermoFisher
SCIENTIFIC

Thermo Scientific Sterilin 90, 140 and 100mm square Petri dishes are manufactured in accordance with standard EN ISO 24998:2008

Standard 90mm Petri Dishes are used by microbiologists to culture microorganisms on solid media.

Membrane Solutions

MS® offers membraneproducts in a variety of configurations, materials and sizes; each designed to meet specific application needs. There are multiple membrane materials currently employed for liquid/liquid, liquid/solid and gas/solid separation: PES membrane, PTFE membrane, PVDF membrane, NYmembrane and PP membrane

Milwaukee digital refractometers give you an easy, accurate way to measure BRIX and salinity. Portable with a sample size of just two metric drops. Easy to clean and maintain with automated temperature compensation and single point calibration.

PoliControl
Analytical Instruments

Policontrol's ColiControl is an advanced culture medium designed for the simultaneous detection of total coliforms and *Escherichia coli* in water samples. Engineered to streamline the testing process, ColiControl offers rapid preparation, exceptional reliability, and precise results.

TAAG

TAAG offers advanced molecular diagnostics for the rapid detection of foodborne pathogens using innovative RNA technology, multiplex PCR, and AI-powered data analysis. Designed for food manufacturers, testing laboratories, and quality assurance professionals, TAAG solutions deliver fast, reliable, and actionable results to support the highest food safety standards.

Biolife Italiana
Mascia Brunelli

Through its microbiology division, Mascia Brunelli provides culture media and microbiological testing solutions used extensively in food safety laboratories. The company supports food manufacturers and quality control laboratories with products for the detection and monitoring of bacterial contamination.

Food Testing Portfolio

- **Dehydrated culture media**
- **Ready-to-use culture media**
- **Microbial detection systems**
- **Laboratory consumables**
- **Environmental monitoring products**

ATAGO®

ATAGO is one of the world's leading manufacturers of analytical instruments for food and beverage quality control. Its refractometers, salt meters, and pH meters are widely used throughout the food industry to measure concentration, sweetness (Brix), salinity, and product consistency.

Food Testing Products

- **Digital Refractometers**
- **Brix Meters**
- **Salt Meters**
- **pH Meters**
- **Pocket Food Testing Instruments**

ALLA France

A leading manufacturer of precision measuring instruments. The product portfolio includes digital and glass thermometers, infrared thermometers, hydrometers, densimeters, refractometers, pH meters, data loggers, timers, oil quality testers, and calibration instruments.

SCITEK

Complete Laboratory Solutions **from biosafety cabinets and laminar flow cabinets to incubators, ovens, autoclaves, analytical balances, and water baths, SCITEK delivers reliable, high-performance laboratory equipment designed to support research, diagnostics, quality control, and industrial applications.**

IUL's colony countermakes this process easier and faster through the use of LED lighting and a high-quality magnifying glass.Masticator paddle blenders enable thorough homogenization of samples while isolating them from any possible contamination.
Spin AIR Microbial air contamination monitoring is a key process in facilities with special air cleanliness needs. Spin Air samplers give users a compact, portable, simple solution to air sampling. IUL's air samplers are very compact and designed for easy transportation.

DLAB Scientific delivers reliable and innovative laboratory instruments designed for precision, efficiency, and everyday performance. From liquid handling and sample preparation to temperature control and centrifugation, DLAB provides dependable solutions for research, quality control, clinical, and food safety laboratories.
